MEMORANDUM

TO: Robert L. Sholar
Environmental Specialist II
Louisville Field Office

FROM: Daniel R. Dolan, Chief *DRD*
Hazardous Material Management Section

DATE: March 29, 1979

SUBJECT: Remaining Drums at Taylor Site - Uninventoried

Per our conversation of this date, commence inventorying the remaining drums on the A.L. Taylor site which were not included in the original inventory done by you. It will be necessary for you to use the same marking system as previously employed by O & H Materials. Effective this date I am assigning Steve Shannon to assist you with the effort.

It is my understanding that the Secretary desires this information for his communications with the generators and to finally fix the total liquid-solid-empty drum numbers on the site.
